

## WET POND OPERATION & MAINTENANCE AGREEMENT

This Operation and Maintenance Agreement (“Agreement”) is established this \_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_, by \_\_\_\_\_ (“Owner”), who is the owner of the Property (hereinafter defined), on behalf of the Owner, the Association (if applicable), and all successor Owners of the Property and the Town of Apex (“Town”).

The “Property” is that certain real property described as PIN # \_\_\_\_\_, commonly known as \_\_\_\_\_, it being the same land conveyed to Owner by deed recorded in Book \_\_\_\_\_ at page \_\_\_\_\_ in the Wake County Register of Deeds.

Owner represents, warrants, and agrees that Owner is financially responsible for the construction, maintenance, repair and replacement of all stormwater control structures, appurtenances and vegetation, including the impoundment, located on the Property. Owner agrees to perform the maintenance as outlined below and as may be applicable or required as part of the regulations set forth in Section 6.1.12 of the Town Unified Development Ordinance. A Homeowners Association or Property Owners Association shall not be the financially responsible party unless more than 50% of the lots or units on the Property have been sold and a resident of the Association has been named the president.

Owner agrees that the Town has the right to access the Stormwater Control Measures (hereinafter

“SCM”) on the Property, as deemed necessary in the Town’s sole discretion, by way of the ‘SCM Maintenance & Access easement’ as recorded on the final plat. Owner recognizes and agrees that Owner is responsible for the maintenance and upkeep of the SCM Maintenance & Access easement. Owner acknowledges that Town’s authorized access to the SCM(s) does not create any operation or maintenance responsibility or obligation on the part of the Town.

Owner shall keep a maintenance record for routine maintenance performed related to SCMs on the Property (“SCM Maintenance Record”). The SCM Maintenance Record shall be kept updated by the Owner and be submitted to the Town each year as part of the required annual inspection report package. Any deficiencies noted during routine maintenance shall be corrected, repaired or replaced immediately by Owner. These deficiencies can affect the safety of the public and the pollutant removal efficiency of the SCM.

NUMBER OF WET PONDS: \_\_\_\_\_ *(If multiple SCMs of the same type are being recorded, please list below which SCMs are being recorded as labeled on approved construction drawings, e.g. SCM #1, SCM #2, etc.)*

---

SCMs being recorded with this agreement

A wet pond is a stormwater management device that includes a permanent pool of water for removing pollutants and additional capacity above the permanent pool for detaining stormwater runoff. The pond system is defined as the main treatment area, outlet structure, pretreatment including forebays, grassed swales, and the vegetated filter if one is provided.

Inspection and maintenance procedures:

- Immediately after the wet pond is planted, the plants on the vegetated shelf and perimeter shall be watered twice weekly or until the plants become established (commonly six weeks). The watering shall be in accordance with the Town Water Conservation Ordinance.
- No portion of the wet pond shall be fertilized after the first initial fertilization that is required to establish the plants on the vegetated shelf.
- Stable groundcover shall be maintained in the drainage area to reduce sediment load to the pond.

After the wet pond is established, Owner shall inspect it once a quarter. Owner shall keep records of inspection and maintenance.

Notices to Owner shall be sent to (please fill in all blanks):

---

Name

---

Phone number

---

Mailing address

E-mail

---

City, State, ZIP

Notices to Town shall be sent to:

Stormwater & Utility Engineering Manager

P.O. Box 250

Apex, NC 27502

(919) 249-3413

Inspection activities shall be performed by Owner as follows. Any problems that are found shall be repaired by Owner immediately.

<b>SCM Element</b>	<b>Potential Problems</b>	<b>Problem Remediation</b>
<b>The entire SCM</b>	Trash/debris is present.	Remove the trash/debris.
<b>Pond Perimeter</b>	Areas of bare soil and/or erosive gullies have formed.	Regrade the soil if necessary to remove the gully and plant a ground cover. Water until it is established; provide lime and a onetime fertilizer application.
	Vegetation is too short or too long.	Maintain vegetation at a height of approximately six inches.
<b>Inlet</b>	The pipe is clogged.	Unclog the pipe. Dispose of the sediment offsite.
	The pipe is cracked or otherwise damaged.	Replace the pipe.
	Erosion is occurring in the swale.	Regrade the swale if necessary to smooth it over and provide erosion control devices such as reinforced turf matting or riprap to avoid future problems with erosion.
<b>Forebay</b>	Sediment has accumulated to a depth greater than the original design depth for sediment storage.	Search for the source of the sediment and remedy the problem if possible. Remove the sediment and dispose of it in a location where it will not cause impacts to streams or the SCM.
	Erosion has occurred.	Provide additional erosion protection such as reinforced turf matting or riprap if needed to prevent future erosion problems.
	Weeds are present.	Remove the weeds, preferably by hand. If pesticide is used, wipe it on the plants rather than spraying.
<b>Vegetated Shelf</b>	Best professional practices show that pruning is needed to maintain optimal plant health.	Prune according to best professional practices.

SCM Element	Potential Problems	Problem Remediation
	Plants are dead, diseased, or dying.	Determine the source of the problem: soils, hydrology, disease, etc. Remedy the problem and replace plants. Provide a onetime fertilizer application to establish ground cover if a soil test indicates it is necessary.
	Weeds are present.	Remove the weeds, preferably by hand. If pesticide is used, wipe it on the plants rather than spraying.
<b>Main treatment area</b>	Sediment has accumulated to a depth greater than the original depth for sediment storage.	Search for the source of the sediment and remedy the problem if possible. Remove the sediment and dispose of it in a location where it will not cause impacts to streams or the SCM.
	Algal growth covers over 50% of the area.	Consult a professional to remove and control algal growth.
	Cattails, phragmites or other invasive plants cover 50% of the pond surface.	Remove the plants by wiping them with pesticide (do not spray).
<b>Embankment</b>	Shrubs have started to grow on the embankment.	Remove shrubs immediately.
	Evidence of muskrat or beaver activity is present.	Use traps to remove muskrats and consult a professional to remove beavers.
	A tree has started to grow on the embankment.	Consult a dam safety specialist to remove the tree.
	An annual inspection shows that the embankment needs repair.	Make all needed repairs.
<b>Outlet device</b>	Clogging has occurred.	Clean out the outlet device. Dispose of the sediment offsite.
	The outlet device is damaged.	Repair or replace the outlet device.
	Erosion or other signs of damage have occurred in the outlet.	Repair or replace as necessary.

SCM Element	Potential Problems	Problem Remediation
<b>Outlet protection</b>	Erosion has occurred, rip rap has been misplaced, or contamination has occurred.	Repair or replace as necessary.
<b>Floating island wetland (if applicable)</b>	Weeds or volunteer trees are growing on the mat.	Remove the weeds or trees.
	The anchor cable is damaged, disconnected, or missing.	Restore the anchor cable to its design state.

## **Remedies for Violations of this Agreement**

If the Owner shall fail to satisfactorily maintain or repair the SCM as set forth above, or otherwise violates this Agreement, the Town may order the Owner to undertake necessary actions to correct such violation. If the Owner fails to comply with such order within (30) days from the date thereof, the Town, in its sole discretion may enter the Property and perform all necessary work to place the SCM in proper working condition. The full cost of performing the work shall be a lien on the property as provided in G.S. 160A-193. In such event, the Town shall assess against Owner all of its related costs and expenses (including but not limited to employee time, materials and supplies, vehicle and equipment use, administrative expenses, plus all contract costs, if required for repairs, design or inspection) and the Owner hereby agrees to timely pay the same.

Where the Owner is the sole owner of the development, if this total amount is not paid in full within three (3) months of the assessment, then such amount shall be a continuing lien on the Property. Where there is more than one owner of record of the Property, and if the total amount is not paid in full to the Town within three (3) months of the assessment, then each owner of record shall become personally liable for such owner's proportionate share of the assessment. If the proportionate share of the assessment is not paid in full by each such owner within thirty (30) days following receipt of notice thereof from the Town, then such amount shall be a continuing lien on the property owned by each owner, such owner's heirs, devisees, personal representatives, successors and/or assigns.

The Town shall have the right to bring an action against the Owner and/or each individual owner to recover all sums due, including its expenses, damages and its reasonable attorney fees, seek injunctive and equitable relief, and/or such other and further relief as may be just and appropriate.

The remedies provided by this paragraph are cumulative and are in addition to any other remedies provided by law.

Please fill out ONE of the following FOUR signature forms (INDIVIDUAL, CORPORATION, LLC, OR GENERAL PARTNERSHIP) that is the most appropriate description of the type of property owner. Before recording with Wake County, please delete this page and the remaining THREE pages that do not apply.

**INDIVIDUAL**

IN WITNESS WHEREOF, the Owner has hereunto set its hand and seal, or if corporate, has caused this instrument to be signed in its corporate name by its duly authorized officers and its seal to be hereunto affixed by authority of its Board of Directors, this the day and year first above written.
